Dear Sir:

Subject: SNM Inventory Reports for Period Ending
July 31, 1989

Enclosed are the SNM Physical Inventory Summary Reports for plutonium and enriched uranium held at Rockwell International's Rocketdyne Division under RIS's LAL and ZAZ. These reports cover SNM activities for the period June 1, 1989 through July 31, 1989.

Because of no activity or no material, reports for LAL material and for ZAZ plutonium and U-233 have not been included. Please refer to our May 31, 1984 inventory report as the reference values for these reports. Should any activity occur, we will reinitiate these reports.

Based on our records, we have concluded that no material diversions occurred. ID and LEID have been reviewed to ascertain compliance with the requirements as stated in 10 CFR 70.51 (e) (5). The total ID and LEID for this period are within the constraints of 10 CFR 70.53 (b) (1) or (2).

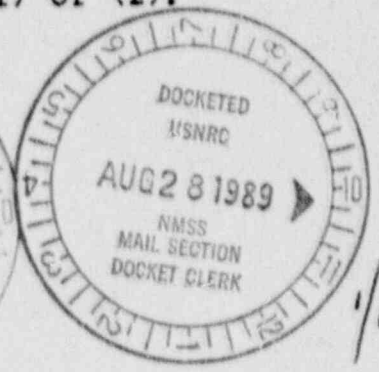

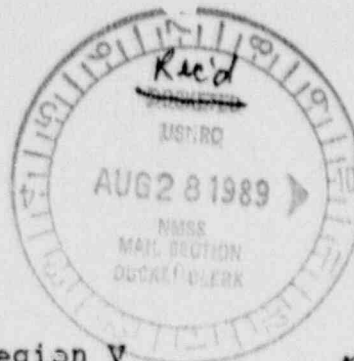

Very truly yours,

V. J. Schaubert

V. J. Schaubert, Manager
