Office of Nuclear Material Safety
and Safeguards
U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, D. C. 20555

Subject: License SNM-1067, Fundamental Nuclear Material
Control Plan Amendment Correction

Reference: Letter LD-89-085, A. E. Scherer, (C-E) to
C. N. Smith (NRC), dated July 31, 1989

Dear Mr. Smith:

Combustion Engineering recently submitted via the Reference an amendment request to the Nuclear Regulatory Commission for the Fundamental Nuclear Materials Control Plan for our Windsor Fuel Manufacturing Facility, License No. SNM-1067. This letter submits a corrected replacement page.

The purpose of the replacement page is to correct the omission of information from Figure I.4-1, on Page I.4-8. The change page has had it's date changed to be consistent with the date of this letter, however, the page revision number has not been altered. The information added concerns the method used to account for U235 in laundry operations. The Enclosure to this letter provides the proposed change page supporting our amendment request. To facilitate your review, the changes are reflected by a bar on the right hand margin of the page. Six (6) copies of the Enclosure are included herewith for your use in evaluating our request.
