RE: Below Regulatory Concern Petition

Dear Sirs:

I am writing to voice my concern over the EPA-NRC proposal to reclassify radioactive waste as "below regulatory concern."

Any radioactive waste, regardless of the logistical headache and pricetag, should be carefully stored in special facilities which are clearly identified as containing radioactive waste.

Having produced millions of cubic feet of this waste without knowing how to dispose of it is bad enough, but to avoid the problem by refusing to admit it exists, is no solution.

Please reconsider supporting this proposal. Mixing bad trash with good trash is bad business and risks the health and safety of all Americans.

Sincerely,

Susan Pedicord
