

APR 19 1988

Ref: SA/LAB

MEMORANDUM FOR: Richard E. Cunningham, Director  
 Division of Industrial and Medical  
 Nuclear Safety, NMSS

FROM: Donald A. Nussbaumer, Assistant Director  
 for State Agreements Program  
 State, Local and Indian Tribe Programs, GPA

SUBJECT: APPROVAL OF NON-IND/NDA RADIOPHARMACEUTICALS

We have been asked by the State of California for an interpretation of the authorizations extended to type A broad medical licenses. Specifically, can their Radiation Safety Committees authorize physicians to use non-IND or NDA radiopharmaceuticals in human imaging and therapy? Can a Radioactive Drug Research Committee (RDRC) approve the above mentioned drugs? Are there any special guides or license conditions applicable to this use of radiopharmaceuticals?

May we please hear from you on this matter by May 2, 1988?

cc: N. McElroy, NMSS
