Gentlemen:

Thank you for your letter of September 18, 1989, in response to our letter and attached Notice of Violation both dated September 6, 1989. We have reviewed your reply and find it responsive to the concerns raised in our Notice of Violation. We will review the implementation of your corrective actions during a future inspection to determine whether full compliance has been achieved and will be maintained.

Sincerely,

Re: License: 49-01380-02
Docket: 30-17735/89-01

Dear Mr. Fisher:

This letter is in response to your letter dated September 6, 1989, regarding the recent inspection by Mr. Holley of our teletherapy program.

In accordance with the requirements of our response as outlined in the "Notice of Violation", we submit the following information:

- 1) Refresher training on the cobalt machine safety procedures had not been conducted routinely because the machine is no longer used.
- 2) A notebook has been established to log the date and attendance of refresher training sessions, and a training in-service was held on August 3, 1989.
- 3) We will ensure that refresher training is conducted at least annually from now on.
- 4) Since we have held a refresher training session, we feel that we are now in full compliance.

We hope that this information will be sufficient to enable you to complete your review of our facility.

Sincerely,

Jon M. Gates,
Administrator

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Wesley Holley of this office on July 25, 1989, of the activities authorized by NRC Byproduct Material License 49-01380-02, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

During this inspection, certain of your activities were found not to be conducted in full compliance with NRC requirements. Consequently, you are required to respond to this matter in writing, in accordance with the provisions of Section 2.201 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations. Your response should be based on the specifics contained in the Notice of Violation enclosed with this letter.

The response directed by this letter and the accompanying Notice is not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
