Gentlemen:

Special Report

Limiting Condition for Operation (LCO) 3.7.8.1 of the Trojan Technical Specifications (TTS) requires submittal of a Special Report if one fire pump is inoperable for greater than 7 days.

The diesel fire pump was declared inoperable on September 27, 1989. A fire engine, from the local municipality, was staged onsite to provide for the loss of redundancy of the diesel fire pump.

The pump was returned to service on October 13, 1989.

Sincerely,

C. P. Yundt
General Manager
Trojan Nuclear Plant
