License No. 13-0148-01

Dear Ms. Simmons:

Enclosed you will find the copies of the NRC Form 591 signed and dated as you requested in your recent letter. We have already taken the appropriate steps to meet compliance with the violation in the regulation as indicated, and we have also implemented your recommendations as well. If possible, however, I would like to have you send a letter to me or the administration, whichever you prefer, indicating the scope of your inspection and quality of the department apart from the one violation. My request is basically for this reason. In my opinion, when this violation is presented to the Radiation Safety Committee, it will be viewed as something negligent on the part of Dr. Torabi and myself. As always we have tried to comply with our license to the letter and have taken measures to have perfect inspection results this year from the I.S.B.H., C.A.P. and J.C.A.H.O. in our respective departments. I feel an additional summation letter of your inspection will help to maintain our reputation, and demonstrate we are not derelict in our duties, but capable of operating our departments in a credible manner.

Sincerely,

K. Vanderhye

Regional Director Nuclear Med.
