URFO:REH
Docket No. 40-8981
Docket No. 40-8958
Docket No. 40-8783

Uranerz U.S.A., Inc.
190 Pronghorn
Casper, Wyoming 82601

Gentlemen:

We have been advised by our Office of Investigations that they have conducted an investigation into the activities of prior employees of Ogle Petroleum, Inc. of California during their activities in Wyoming. Results from their investigative activities provide a basis for our concern about the veracity of certain of those personnel. Final determinations of actions to be taken by the NRC in this regard are not yet complete.

To avoid a potential impact on your pending license application as well as your current research and development license, we are requesting that you do the following:

- a) Determine if you are utilizing either as employees, or as employees of partner, parent or consultant organizations, any prior employees of Ogle Petroleum, Inc. of California for activities related to your currently licensed activities or your pending license applications.
- b) Pursuant to Title 10, Part 2, Code of Federal Regulations, Paragraph 2.108(a), you are requested to provide to this office within 30 days of your receipt of this letter the names of each individual identified in a) above. For each identified individual, please provide a description of the responsibilities and authority each identified individual has or will have in the currently licensed Uranerz research and development project, as well as the commercial applications for the Ruth ISL and North Butte ISL projects.

We will gladly discuss any questions you may have relative to this letter or the referenced material.

Sincerely,
ORIGINAL SIGNED BY
ROBERT D. MARTIN
