Gentlemen:

Subject: Response to Generic Letter 89-07, "Power Reactor Safeguards  
Contingency Planning for Surface Vehicle Bombs"

On April 28, 1989, Nuclear Regulatory Commission (NRC) issued Generic Letter 89-07 (Log Number 2919), "Power Reactor Safeguards Contingency Planning for Surface Vehicle Bombs." The Generic Letter requested Toledo Edison to confirm that the safeguards contingency implementing procedures identify short-term actions that could be taken to protect against attempted radiological sabotage involving a surface vehicle bomb. Toledo Edison has revised its safeguards contingency implementing procedures to address short-term actions using the guidance provided in the Generic Letter (i.e., safe standoff distance, land vehicle approach, identification of short-range measures, and short-range contingency measures in the event of land vehicle threat).

If you have any questions concerning this matter, please contact Mr. R. W. Schrauder, Nuclear Licensing Manager, at (419) 249-2366.

Very truly yours,

GAB/ssg
