

ENCLOSURE 1

NOTICE OF VIOLATION

Carolina Power and Light Company
Brunswick

Docket Nos. 50-325, 50-324
License Nos. DPR-71, DPR-62

During the Nuclear Regulatory Commission (NRC) inspection conducted on September 18-22, 1989, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C (1989), the violations are listed below:

- A. 10 CFR 50.54(q) requires that nuclear power reactor licensees follow and maintain in effect Emergency Plans which meet the requirements of 10 CFR 50.47(b). Technical Specification 6.8.1.e requires, in part, that written procedures shall be implemented and maintained covering the Emergency Plan implementation.

Section 6.1 of the Brunswick Emergency Plan states the training program provides initial training and annual retraining of the emergency response organization. The specific training requirements for emergency response personnel are defined in Section 3.0 of Plant Emergency Procedure-04.3 and Section 4.0 of Training Instruction-306.

Contrary to the above, individuals were assigned to the emergency organization that were not trained in accordance with Attachment 1 of Training Instruction-306 or Section 3 of Plant Emergency Procedure-04.3.

This is a Severity Level IV violation (Supplement VIII).

- B. 10 CFR 50.54(q) requires that nuclear power reactor licensees follow and maintain in effect Emergency Plans which meet the requirements of 10 CFR 50.47(b). Technical Specification 6.8.1.e requires, in part, that written procedures shall be implemented and maintained covering the Emergency Plan implementation.

Section 3.5 of the Brunswick Emergency Plan addresses notification and activation of the onsite and offsite emergency response organization. Section 6.3 of Plant Emergency Procedure-02.6.21 "Emergency Communicator" details the Control Room activities regarding notification responsibilities. According to Section 6.3.1, follow-up notifications should be made at 60 minute intervals or more frequently if warranted by changing conditions.

Contrary to the above, on June 17, 1989, the licensee declared an Unusual Event and made initial notifications to authorities, but failed to make a follow-up notification for two hours.

This is a Severity Level IV violation (Supplement VIII).

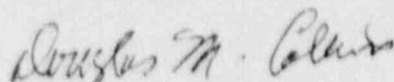

Carolina Power and Light Company
Brunswick

2

Docket Nos. 50-325, 50-324
License Nos. DPR-71, DPR-62

Pursuant to the provisions of 10 CFR 2.201, Carolina Power and Light Company is hereby required to submit a written statement or explanation to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, Region II, and a copy to the NRC Resident Inspector, Brunswick, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) admission or denial of the violation, (2) the reason for the violation if admitted, (3) the corrective steps which have been taken and the results achieved, (4) the corrective steps which will be taken to avoid further violations, and (5) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending the response time. If an adequate reply is not received within the time specified in this Notice, an order may be issued to show cause why the license should not be modified, suspended, or revoked or why such other action as may be proper should not be taken.

FOR THE NUCLEAR REGULATORY COMMISSION

Douglas M. Collins, Chief
Emergency Preparedness and
Radiological Protection Branch
Division of Radiation Safety
and Safeguards
