

AUG 30 1984

MEMORANDUM FOR: R. S. Brown, Jr., Assistant
to the Director and Chief
Program Support Branch, NMSS

FROM: R. F. Burnett, Director
Division of Safeguards, NMSS

SUBJECT: STATEMENT OF WORK FOR CONSEQUENCES OF SABOTAGE AT NONPOWER
REACTORS

This refers to my memorandum to you dated August 27, 1984, which submitted a Statement of Work (SOW) for consequences of sabotage at nonpower reactors. The memorandum requested that 93K be committed for this project concurrent with the transmittal of the SOW to Los Alamos National Laboratory. The 93K was primarily computed on tasks which were developed prior to NRR's policy review of the SOW. As a result of their review, an additional task has been added which will determine the effects of an "insider" threat at certain nonpower reactors. Accordingly, and if available, we request that an additional 70K be added and committed in 1984.

R. F. Burnett, Director
Division of Safeguards, NMSS
