MEMORANDUM FOR: Robert F. Burnett, Director
 Division of Safeguards, NMSS

FROM: R. S. Brown, Jr., Assistant to the
 Director and Chief,
 Program Support Branch, NMSS

SUBJECT: CONSEQUENCES OF SABOTAGE AT NONPOWER REACTORS, FIN A7153

This is in response to your memorandum dated August 30, 1984, which requested additional FY84 funding of \$70K for the subject project.

The Program Support Branch will be submitting a work order to Los Alamos National Laboratory for \$93K (currently budgeted) for initiation of this project. Due to the fact that this effort is commencing so late in the fiscal year, this funding should be more than adequate to cover the cost of work to be performed in FY84. Concurrent with this action, a proposal will be requested for FY84-FY86.

The Division of Safeguards will review the LANL's proposal when received and at that time should determine a reasonable funding profile. Your Division should budget for the appropriate funding levels and, if necessary, revise the Project Descriptive Summary accordingly. FY85 funding will be provided LANL after receipt of the proposal evaluation and a funding authorization from your Division.
