ATTN: Mr. T. F. Bott, Q-6, MS K557
Principal Investigator
Los Alamos, New Mexico 87545

Dear Terry:

Enclosed is a copy of a "Declaration of Dr. James C. Warf" which was brought before the Atomic Safety and Licensing Board during the licensing renewal proceeding for the UCLA nonpower reactor. The document may be useful in providing an insight on the effects of fire on certain materials (e.g., graphite, uranium, magnesium, etc.) and also the effects of certain materials used to fight such fires.

Sincerely,

151

Donald M. Carlson
