Dear Don:

In response to your letter of December 27, 1984, we have reviewed the study "Consequences of Sabotage of Nonpower Reactors." We do not feel that we can significantly compress any of the study even with increased funding because of manpower limitations. We simply do not have any more staff members to put on the job. We also feel that a "quick look" study would only detract from the main study by siphoning off available personnel. Therefore, we feel that a significant acceleration of the work is not feasible.

Sincerely,

T. F. Bott

TFB/jl
