Vice President and General
Manager, Lighting Product
Division
Lighting Business Group
Nela Park
Cleveland, OH 44112

Gentlemen:

This will acknowledge receipt of your letter dated September 21, 1989 which enclosed a check in the amount of \$24,000 in full payment of the civil penalty proposed in our letter dated August 25, 1989 and describes your corrective actions. We have no further questions regarding your corrective actions and will review their implementation during future inspections.

The attachments to your September 21, 1989 letter appear to adequately address our concerns for a management controlled audit program and a program for conducting breathing-zone air samples at your facilities. However, since these programs are not reflected in your current license, it is appropriate for the NRC Region III licensing staff to review your proposed Management Control and Audit Plan and your Radiation Safety Manual for Thorium Use via a license amendment or renewal action. Region III conveyed this to you in a telephone conversation and has received your October 17, 1989 letter in response. Your letter requested that NRC incorporate the above plan and manual into your license renewal. Your letter also stated that the remainder of the renewal application would be sent for NRC's review by November 30, 1989. Upon receipt, NRC Region III representatives plan to visit your facility to discuss the plan, manual and application. Any questions on the above licensing action should be discussed with Mr. Michael McCann of our Region III office.

Sincerely,

Original Signed By
James Lieberman
