

NOV 03 1989

Docket Nos. 50-338, 50-339
License Nos. NPF-4, NPF-7

Virginia Electric and Power Company
ATTN: Mr. W. L. Stewart
Senior Vice President - Power
5000 Dominion Boulevard
Glen Allen, VA 23060

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-338/26 AND 50-339/89-26

Thank you for your response of October 10, 1989, to our Notice of Violation issued on September 21, 1989, concerning activities conducted at your North Anna facility. We have evaluated your response and found that it meets the requirements of 10 CFR 2.201. We reviewed your response and noted your acceptance of the violation and the exception related to operability for Example 2. We acknowledge that the closure of 2-RS-MOV-201B did not render the B train of the outside recirculation spray system or a casing cooling subsystem inoperable. At the time of the violation, neither the shift supervisor nor the NRC inspectors were aware of the fact that 2-RS-MOV-201B receives an "assure" open signal upon initiation of a containment depressurization signal. We still consider Example 2 of the violation valid with the exception of the outside recirculation spray system operability. We will examine the implementation of your corrective actions during future inspections.

We appreciate your cooperation in this matter.

Sincerely,

ORIGINAL SIGNED BY
MARVIN V. SINKULE
