FACILITY LICENSE APPLICATION FILED BY THE TOLEDO EDISON COMPANY AND  
THE CLEVELAND ELECTRIC ILLUMINATING COMPANY, DAVIS-BESSE NUCLEAR  
POWER STATION, DOCKET NO. 50-346

I am forwarding for your review a copy of an application, including  
Volumes 1, 2 and 3 of the Preliminary Safety Analysis Report, filed  
by The Toledo Edison Company and The Cleveland Electric Illuminating  
Company for authorization to construct and operate a pressurized  
water nuclear reactor on the applicants' approximately 900-acre site  
on the southwest shore of Lake Erie in Ottawa County, Ohio. The  
proposed reactor, designated as the Davis-Besse Nuclear Power Station,  
is designed for initial operation at approximately 2633 megawatts  
thermal, with a net electrical output of about 872 megawatts.

Please review the application and provide Mr. C. A. Lovejoy, Office of  
the Controller, with your comments as to the reasonableness of the  
applicants' construction cost estimates for the proposed reactor. At  
such time as you have completed your review, please return the  
attached documents together with a copy of your memo to Mr. Lovejoy.  
In the event that additional information is needed in order to  
complete your review, please let us know.

Original signed by  
Robert L. Tedesco  
Robert L. Tedesco, Chief  
Reactor Project Branch 2  
Division of Reactor Licensing
