**FACILITY LICENSE APPLICATION FILED BY THE TOLEDO EDISON COMPANY
AND THE CLEVELAND ELECTRIC ILLUMINATING COMPANY, DAVIS-BESSE NUCLEAR
POWER STATION, DOCKET NO. 50-346**

I am forwarding for your review Volumes 1, 2 and 3 of the Preliminary Safety Analysis Report filed by the Toledo Edison Company and The Cleveland Electric Illuminating Company with application for authorization to construct and operate a pressurized water nuclear reactor on the applicants' approximately 900-acre site on the southwest shore of Lake Erie in Ottawa County, Ohio. The proposed reactor, designated as the Davis-Besse Nuclear Power Station, is designed for initial operation at approximately 2633 megawatts thermal, with a net electrical output of about 872 megawatts.

Please review the Preliminary Safety Analysis Report and provide Mr. C. A. Lovejoy, Office of the Controller, with your comments as to the reasonableness of the first core fuel requirements for a reactor of this design and power level. Please send us a copy of your comments.
