FACILITY LICENSE APPLICATION FILED BY THE TOLEDO EDISON COMPANY AND THE CLEVELAND ELECTRIC ILLUMINATING COMPANY, DAVIS-BESSE NUCLEAR POWER STATION, DOCKET NO. 50-346

I am forwarding the "General Information" portion of an application filed by The Toledo Edison Company and The Cleveland Electric Illuminating Company for authorization to construct and operate a pressurized water nuclear reactor on the applicants' approximately 900-acre site on the southwest shore of Lake Erie in Ottawa County, Ohio. The proposed reactor, designated as the Davis-Besse Nuclear Power Station, is designed for initial operation at approximately 2633 megawatts thermal, with a net electrical output of about 872 megawatts.

The applicants have furnished financial data and construction cost estimates as required by the Commission's regulations. You will note that Toledo Edison and Cleveland Electric as tenants in common will share undivided ownership of the station, with each sharing the costs of construction and operation of the station in proportion to his undivided ownership interests of 52.5% and 47.5%, respectively.

If any additional information is needed in order to complete your review of the applicants' financial qualifications to engage in the proposed activities, please let us know.
