

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

AUG 23 1976

Docket No. 50-346

Toledo Edison Company  
ATTN: Mr. Lowell E. Roe, Vice President  
Facilities Development  
Edison Plaza  
300 Madison Avenue  
Toledo, Ohio 43652

Gentlemen:

The Nuclear Regulatory Commission recently forwarded a letter to your company concerning procedural changes in the initial treatment of an application for a construction permit or facility operating license and amendments thereto. These changes were adopted by NRC and incorporated as amendments to Parts 2, 50, and 51 of 10 CFR, which became effective May 17, 1976.

Paragraph 50.30(c)(1)(i) of 10 CFR Part 50 requires that an applicant submit to the staff, 40 copies of the Safety Analysis Report and any amendments thereto and retain 30 copies for direct distribution to appropriate Federal, State and local officials in accordance with written instructions of the staff.

An initial submission of 40 copies of the SAR is adequate for staff review since it is practicable to break a set of each SAR into sections so that more than one staff member may work concurrently with a single SAR. It is not feasible, however, to divide an amendment to the SAR so that it may be reviewed concurrently by more than one staff member. In many instances, therefore, the staff must reproduce additional copies of the amendments.

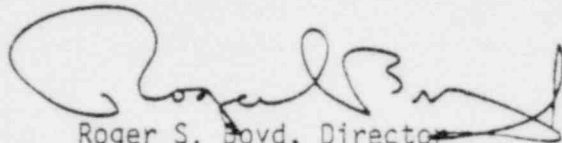

To ensure prompt review of amendments to the SAR by our staff, the NRC has amended paragraph 50.30(c)(1)(i) of 10 CFR Part 50, increasing the required number of copies of amendments to the SAR from 40 to 60 copies. Your company should continue to retain 30 copies for distribution in accordance with our written instructions.

8002030196

Amended paragraph 50.30(c)(1)(i) was published in the Federal Register on Thursday, July 29, 1976 and was effective upon publication. A copy of the Federal Register Notice is enclosed for your information and use.

Also enclosed are two revised service lists to update the service lists that were originally transmitted to your company with our May 1976 letter.

Sincerely,

Roger S. Boyd, Director  
Division of Project Management  
Office of Nuclear Reactor Regulation
