

# rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 10—Energy

### CHAPTER I—NUCLEAR REGULATORY COMMISSION

#### PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

##### Number of Copies of Amendments to Safety Analysis Report

Section 50.30(c)(1)(i) of 10 CFR Part 50 provides that each application for a license to construct and operate a production or utilization facility (including amendments to such applications) should include three signed originals and a specified number of copies. With respect to copies of the safety analysis report, § 50.30(c)(1)(i) requires that 40 copies be submitted to the NRC staff and 30 copies be retained by the applicant for distribution in accordance with the written instructions of the Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate.

An initial submission of 40 copies of the safety analysis report is adequate for staff review since it is practicable to break a set of each safety analysis report into sections so that more than one staff member may work concurrently with a single SAR. It is not feasible, however, in most instances to divide an amendment to the SAR so that it may be reviewed concurrently by more than one staff member. In many instances, the staff must reproduce additional copies of the amendments.

Accordingly, the Commission is increasing the number of copies of amendments to the safety analysis report which

must be submitted to the staff from 40 to 60 copies. This increase in the number of copies to be submitted will materially contribute to the expeditious review of the amendments to the SAR.

Because this amendment relates solely to minor procedural matters, notice of proposed rule making and public procedure thereon are unnecessary and good cause exists to make the amendment effective on July 27, 1976.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendment to Title 10, Code of Federal Regulations, Part 50 is published as a document subject to codification.

1. Paragraph 50.30(c)(1)(i) is amended to read as follows:

§ 50.30 Filing of applications for licenses; oath or affirmation.

(c) *Number of copies of application.*

(1) Each filing of an application for a license to construct and operate a production or utilization facility (including amendments to such applications) should include three signed originals and the following number of copies:

(i) For an application for a license for a facility described in § 50.21(b) or § 50.22, or a testing facility: Fifteen (15) copies of that portion of the application containing the information required by §§ 50.32 and 50.37 (general information) and forty (40) copies of that

portion of the application containing any of the information required by §§ 50.34 and 50.34a (safety analysis report) except that sixty (60) copies shall be filed if such portion of the application is an amendment to the safety analysis report; an additional ten (10) copies of the general information and thirty (30) copies of the safety analysis report, or part thereof or amendment thereto, shall be retained by the applicant for distribution in accordance with the written instructions of the Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate. The Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards may request additional copies of applications and the safety analysis report where the design is of a unique nature or for applications submitted pursuant to this Part 50, Appendices M, N, and O.

Effective date: These amendments become effective on July 29, 1976.

(Sec. 161, Pub. L. 93-703, 88 Stat. 948 (42 U.S.C. 2201); Sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841))

Dated at Bethesda, Md., this 10th day of July 1976.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,  
Executive Director  
for Operations.
