Dear Mrs. Becka:

In the absence of Congressman Mosher who is currently in Florida on a brief business and pleasure trip until the convening of the 92nd Congress, it is my pleasure to acknowledge your recent letter concerning nuclear power plants.

We have contacted the Atomic Energy Commission concerning your protest of the proposed Davis-Besse Nuclear Power Plant near Port Clinton, Ohio and as soon as we hear from them, we will forward their reply. In matters of science, Mr. Mosher considers the advice of scientists, who have carefully investigated the matter, but always considers first the welfare of the people involved.

Congressman Mosher always appreciates hearing from his constituents. Please let us hear from you again regarding matters of mutual concern and interest.

Sincerely,

Roberta Casey, Assistant to
CONGRESSMAN CHARLES A. MOSHER

The Honorable Cong. Mosher:

JAN 10 1971

Dear Sir,

Please do all that is possible to stop the construction of the proposed Davis-Besse Nuclear Power Plant near Port Clinton, Ohio. I am opposed to the obviously dangerous effects of radiation that will be produced by the operation of this plant.

I understand that studies showed a tremendous rise in infant mortality rates in areas surrounding the nuclear power plants that are in operation in Michigan and New York.

Please do all you can to safeguard our future and that of our children.

Gratefully,

Mrs. Louise Beck

FOR RELEASE AT
10:00 A.M. (EST) ON
January 26, 1971

A ten year study by the National Council on Radiation Protection and Measurements (NCRP) has confirmed the validity of most of the basic radiation protection criteria presently used by governmental agencies to regulate the exposure of the population and of radiation workers.

"Our review of the current knowledge of biological effects of radiation exposure provides no basis for any drastic reductions in the recommended exposure levels despite the current urgings of a few critics," said Lauriston S. Taylor, of Washington, President of the NCRP. Dr. Taylor was one of the three spokesmen for the NCRP at a press conference held to announce a new Council report, NCRP Report No. 39, Basic Radiation Protection Criteria. Also speaking at the press conference were H.M. Parker, of Richland, Washington, Chairman of the NCRP scientific committee responsible for the preparation of the report and V.P. Bond, of Brookhaven, New York, a member of the scientific committee.
