

Docket No. 50-346

1971

Mr. Felix J. Stricker
Ms. Ruth E. Stricker
RR 1
Helena, Ohio 43435

Dear Mr. & Ms. Stricker:

Your letters of March 11, 1971, to the President and the Atomic Energy Commission, concerning the construction of the proposed Davis-Besse Nuclear Power Station have been referred to me for reply.

The public hearing for the Davis-Besse Nuclear Power Station was held at Port Clinton, Ohio, between December 8, 1970, and February 12, 1971. On completion of the public hearing on February 12, 1971, the Atomic Safety and Licensing Board directed each of the participants (The Toledo Edison Company, Atomic Energy Commission, and Intervenors, Coalition, Living in a Finer Environment and Mr. G. Lau) to submit their briefs of the hearing testimony. After reviewing these briefs and the hearing testimony, the Atomic Safety and Licensing Board issued on March 23, 1971, its Initial Decision and directed that the Director of Regulation issue a construction permit for the Davis-Besse Nuclear Power Station. On March 24, 1971, the Director of Regulation issued a Construction Permit (CPPR-80) to The Toledo Edison Company and The Cleveland Electric Illuminating Company for construction of the Davis-Besse Nuclear Power Station.

May not be Sincerely, *in your*
district,

Peter A. Morris, Director
Division of Reactor Licensing

Dear Mr. President: —

There seems to be much talk
and little forward action in regards
to our peaceful atomic energy program.
Please let us get started and complete
our planned Uair-Bessie Generative
Reactor here at Lake Erie marsh
lands near Port Clinton Ohio.

The smoke, dust, gime and
waste of the present coal operated
power plants are more than dam-
aging our ecology.

The deaths created by mining dis-
asters are very high and lung
cancer contracted by the living
and dead miners is even greater.

What is the holdup?
I say lets go forward and do it
yolf already started.

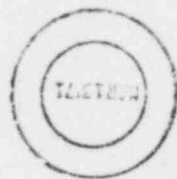

Respectfully yours
F. L. J. Stucker

Dear Sir: —

There seems to be much talk
and little forward action in regard
to our peaceful atomic energy pro-
cess. Please let us get started and
complete our planned Devin-Bessie
Generator Reactor here at Lake Erie
marsh lands near P. T. Chittick, Ohio.

The smoke, dust, grime and
waste of the present coal operated
power plants are more than dam-
aging our ecology.

The deaths created by mining
disasters are very high and lung
cancer contracted by the living
and dead miners is even greater.

What is the holdup?

I say lets go forward and do the
job already started.

Respectfully yours

J. Philip J. Sticker
