Mrs. John Olness  
31 William Penn Drive  
Stonybrook, Long Island,  
New York 11790

Dear Mrs. Olness:

Transmitted herewith are copies of the AEC regulatory staff's proposed rebuttal testimony in Shoreham and the limited appearance of Mrs. June M. Brown, Chairman, Power Generating Subcommittee, League of Women Voters, Lake Erie Basin Committee, Toledo, Ohio, in the Davis-Besse proceeding.

Sincerely,

Martin G. Malsch  
Counsel for AEC Regulatory Staff

Enclosures:  
As stated

Be advised, my enclosed also contains data gathered at the North Ford Fall 1969 power plant during the last two years. During 1969 no gas was released, having 100% radioactive gaseous releases were held back as permitted by the technical specifications of the AEC license for the plant. Miss Regier may be referring to an operating malfunction of the Ford plant which occurred in October 1966, and resulted in the plant being shut down for approximately 100 years. As a result of a blowage of coolant flow, two fuel elements ruptured and partially melted, which resulted in the release of radioactivity to the ambient
