**NOTICE OF OPPORTUNITY FOR PUBLIC PARTICIPATION
IN AEC PUBLIC HEARING ON DAVIS-BESSE NUCLEAR POWER
STATION**

The Atomic Energy Commission will hold a public hearing to be conducted by an Atomic Safety and Licensing Board to determine whether the construction permit issued to The Toledo Edison Company and the Cleveland Electric Illuminating Company authorizing construction of the proposed Davis-Besse Nuclear Power Station in Ottawa County, Ohio, should be continued, modified, terminated or appropriately conditioned to protect environmental values. The hearing will be held in the vicinity of the proposed facility at a time and place to be set later. The issues to be considered at the hearing are specified in a FEDERAL REGISTER notice published on January 5, 1973.

Members of the public who wish to participate in the hearing may do so in one of two ways:

1. They may make a limited appearance. A person making a limited appearance does not become a party to the proceeding but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of the hearing and are permitted by the Licensing Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, by February 5, 1973. Limited appearances will be permitted at the time of the public hearings by the Licensing Board.

2. They may petition for leave to intervene. A person permitted to intervene becomes a party and has a right to participate in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

Any person whose interest may be affected by the proceeding...
