Docket No. 50-346

INTERROGATORIES TO AEC  
REGULATORY STAFF

\* \* \*

Living In a Finer Environment, Irwin I. Oster, Ph.D.,  
and William E. Reany hereby propound the following interrogatories  
to be answered under oath by the appropriate person or persons  
designated by the applicants:

1. How long has SAC been using the area around the Big Rock Point reactor in Michigan for making simulated test runs in unarmed B 52's?
2. What assurances do we have that the area around the proposed Davis-Besse plant will not be used in the future for purposes similar to those described in question 1 above.
3. In whom does the responsibility for quality control reside during construction phases of the Davis-Besse facility.
4. What are the qualifications of those to whom the quality control referred to in question 3 is assigned.
5. Are the specifications as far as materials and manner of fabrication for construction by Bechtel and Babcock & Wilcox fixed as stated in the PSAR or can changes be made as the construction proceeds.
