

POOR
ORIGINAL

Ellen Seaborg,

In regards to the Davis Besse
power plant now under construction
in Ohio, do you agree with David
Lilienthal that nuclear power plants
are the ugliest cloud overhanging America?

How many nuclear plants are now
in full operation in the U.S. Has any
of them had a accident

To what extent, if any, can all the
people who might be injured, at a
distance, by a serious reactor
accident prevent the construction
of the plant in their community.

How much radio-activity could
be released into the air legally and
how far will it carry?

Sincerely,
Mr. Louis Loefer
