Gentlemen:

By letters dated February 22, 1971, a copy of which is enclosed, we have forwarded our Limited Appearance answers and those of the Regulatory Staff to the people who made limited appearances at the public hearing.

Yours very truly,

Lowell E. Roe,
Chief Mechanical Engineer

At the request of the Atomic Safety and Licensing Board, we are enclosing for your information answers to issues raised by you and other persons making limited appearances during the public hearing in Port Clinton for the Davis-Besse Nuclear Power Station. These answers were prepared by the AEC Regulatory Staff and by The Toledo Edison Company.

We believe that the enclosures are responsive to your concerns and demonstrate why we believe that the station will not be inimical to the public health and safety.

Yours very truly,

Lowell E. Roe,
Chief Mechanical Engineer
