Dear Mr. Zion:

Your letter to the President concerning the proposed Davis-Besse Nuclear Power Station has been brought to the attention of the Atomic Energy Commission for consideration and reply.

In response to a number of inquiries on the proposed plant, we have prepared the enclosed summary which describes the proceedings concerned with the licensing of the plant, and the controls that the AEC will have over the plant during its lifetime.

In addition, you may be interested in the enclosed detailed statement of environmental considerations associated with the proposed construction and operation of the Davis-Besse plant. This detailed statement was prepared by the AEC regulatory staff as required by the National Environmental Policy Act of 1969.

Sincerely,

151
Peter A. Morris, Director
Division of Reactor Licensing

Julius H. Rubin
For the Chairman

746 Evesham Avenue.
Toledo, Ohio. 43607.
Jan. 26, 1971.

The White House.
Mr. Richard Nixon.
President Of The United States.

Dear Mr. Nixon;

I am writing you in regards to the proposed new Davis-Besse Nuclear Power Station that will be constructed new Oak Harbor, Ohio, on the shores of Lake Erie.

It is a matter of great importance that this power station be not built. as you know at the present time this large power station will bring a danger point to all the near population, and not to mention wild life in this area. The site that has been selected by the Toledo Edison Company I believe was in very poor judgement. The prime area is part of what we call Vacation land, and many people use this whole area for vacation reasons in the summer, as well as ice fishing during the winter months. Right next to this power station are summer homes some folks live there year around. I have my summer home and enjoy it real much. You Sir must know how nice it is to get away from the city, and enjoy a little rest by the water. now with this power station I need not to explain to you what might happen.

Talks are going on at Port Clinton right now to try and stop this station from going up, but it will take alot of hard work to do so. They say one cannot stop progress, well thats easy to say, and little one can do. I am sure this power station could be constructed some place else where it would not endanger the environment, and the danger of Nuclear fall-out.

please Mr. President see what you can do for us folks here at Sand Beach, this power plant will be about 6000 feet away from us. please write me, and inform me what you can do, or what we can do best for ourselves.

Thank you for your time, hope to hear from you real soon.

Best regards,

Mr. John F. Zion.
