Docket No. 50-34

Honorable William E. Minshall
House of Representatives

Dear Mr. Minshall:

Thank you for your referral to the AEC of a letter from Mrs. Lillian Grieger concerning construction of the Davis-Besse nuclear power plant at Port Clinton, Ohio.

The regulatory staff of the Commission (AEC) has completed its safety evaluation of the application to construct and operate this facility. A separate review was made by the Advisory Committee on Reactor Safeguards. A contested public hearing to consider the application is currently underway in the Ohio National Guard Armory, 135 West Perry Street, Port Clinton, Ohio.

I am enclosing a copy of the Notice of Hearing which provides more specifics of possible interest to Mrs. Grieger. Also enclosed is a Detailed Statement on the Environmental Considerations prepared by the regulatory staff pursuant to the provisions of the National Environmental Policy Act of 1969. Copies of the statement have been furnished to the Council on Environmental Quality and appropriate Federal, State and local agencies and will accompany the application through the Commission's review process, including the public hearing.

The enclosed booklet, "Licensing of Power Reactors", describes the Commission's licensing procedures. I hope this information will be helpful to you and your constituent.

Sincerely,

Original Signed by
Chris L. Henderson
