

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-313

ARKANSAS POWER & LIGHT COMPANY

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE

Notice is hereby given that the U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 10 to Facility Operating License No. DPR-51, issued to Arkansas Power & Light Company (the licensee), which revised Technical Specifications for operation of the Arkansas Nuclear One - Unit 1 (the facility) located in Pope County, Arkansas. The amendment is effective as of its date of issuance.

The amendment establishes Limiting Conditions for Operation and Surveillance Requirements for safety related filter systems.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

PRELIMINARY DETERMINATION

NOTICING OF PROPOSED LICENSING AMENDMENT

Licensee: Arkansas Power and Light Company (AP&L)

Request for: Amendment involving tech spec changes (LCO's and surveillance)
for installed filter systems for the Arkansas Nuclear One, Unit 1
(ANO-1) facility safety systems (i.e., systems for which credit
was taken in the safety evaluation).

Request Date: November 7, 1975

Proposed Action: () Pre-notice Recommended
(X) Post-notice Recommended
() Determination delayed pending
completion of Safety Evaluation

Basis for Decision: The requested tech spec changes involve additional limita-
tions and control not presently included in the specs and
are in response to our letter of January 10, 1975,
requesting the change. Current ANO-1 filter specs are
unsatisfactory. The requested change involves no
decrease in safety margins, and no increase in the proba-
bility or consequences of an accident. Based on the
above considerations, the amendment should not be pre-
noticed.
