

Docket No. 50-313

JAN 28 1975

Arkansas Power & Light Company
ATTN: Mr. J. D. Phillips
Senior Vice President
Production, Transmission,
and Engineering
Sixth and Pine Streets
Pine Bluff, Arkansas 71601

Gentlemen:

The Commission has issued the enclosed Amendment No. 9 to Facility Operating License No. DPR-51 for the Arkansas Nuclear One Unit 1, ANO-1. This amendment is in response to your request dated December 10, 1975, which proposed changes to the Administrative Controls (Section 6) of the ANO-1 Technical Specifications.

The amendment incorporates into the ANO-1 Technical Specifications changes to the reporting requirements only, although the remaining portions of the specifications have been changed, where necessary, to eliminate references to "abnormal occurrence." The remainder of the Section 6 Specifications (6.1 through 6.11) will be reviewed at a later date. The changed technical specifications are based on Regulatory Guide 1.16, "Reporting of Operating Information - Appendix A Technical Specifications," Revision 4.

We request that you use the formats presented in the Appendices to Regulatory Guide 1.16, Revision 4, for reporting operating information and that you report events of the type described under the section "Events of Potential Public Interest". Instructions for using these reporting formats are contained in Regulatory Guide 1.16 (a copy is enclosed for your use), and AEC report OOE-SS-001 titled "Instructions for Preparation of Data Entry Sheets for Licensee Event Report (LER) File" of which you were previously provided a copy. This report is modified by updated instructions dated December 3, 1975, which are enclosed. Copy requirements are summarized in Regulatory Guide 10.1, "Compilation of Reporting Requirements for Persons Subject to AEC Regulations", a copy of which is also enclosed. This Guide will assist you in identifying reports that are required by the Commission's regulations set forth in Title 10 Code of Federal Regulations but are not contained in your Technical Specifications. Reports that are required by the regulations have not been repeated in your Technical Specifications.

JAN 20 1978

Copies of the related Safety Evaluation and the Federal Register Notice also are enclosed.

Please note that we have discontinued the use of separate identifying numbers for changes to Technical Specifications. Sequential amendment numbers will be continued as in the past.

Sincerely,

Original Signature
Dennis L. Ziemann

Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Division of Operating Reactors
