Gentlemen:

RE: ARKANSAS NUCLEAR ONE - UNIT NO. 1

By letter dated October 21, 1976, we requested that you submit proposed Technical Specifications on fire protection for Arkansas Unit No. 1. The enclosed sample Technical Specifications are intended to provide guidance in the scope and types of such specifications. The enclosure uses the Standard Technical Specification format and may require some adaptation to conform with the format of your Technical Specifications. Blanks or parentheses appear where the information is plant specific. These sample Technical Specifications are not intended to alter the NRC positions given in Appendix A to Branch Technical Position 9.5-1 which has been previously sent to you. The essential part of this guidance is to indicate the scope of material to be included in the Technical Specifications for your facility in the areas of equipment and administrative requirements, and the actions that we would find appropriate if a licensing condition for operation could not be met. In our previous letter we requested that you submit your proposed Technical Specifications for Fire Protection by December 1, 1976. Since we have now provided the enclosed guidance, we are changing the requested submittal date to January 10, 1977.

We are also enclosing an Errata Sheet for Appendix A to Branch Technical Position APCSB 9.5-1, "Guidance for Fire Protection for Nuclear Power Plants."

Sincerely,

8004910669

Dennis L. Ziemann, Chief
 Operating Reactors Branch #2
 Division of Operating Reactors
