Gentlemen:

Our letters to you of July 11, 1975 and December 17, 1975, provided model technical specifications which are required for shock suppressors protecting safety-related piping systems at Arkansas Nuclear One - Unit No. 1. In your submittals of October 1, 1975 and February 11, 1976, you omitted a number of the provisions given in the model specifications and provided your reasons for the omissions.

We have reviewed your proposed technical specifications and concluded that certain modifications were required to assure that shock suppressors at ANO-1 will function reliably, when needed, as assumed in our accident analyses for the facility. These changes have been discussed with your representatives. The basis for this position is provided in our Safety Evaluation, a copy of which is enclosed. Accordingly, unless you inform us in writing within 20 days of the date of this letter that you do not agree with this course of action, including your reasons, we plan to initiate steps to issue the enclosed changes to the Technical Specifications of ANO-1.

Sincerely,

Original signed by:
Karl R. Goller

Karl R. Goller, Assistant Director
for Operating Reactors
Division of Operating Reactors
