Denver, Colorado 80225

THIS DOCUMENT CONTAINS
POOR QUALITY PAGES

Dear Mr. Waldron:

In accordance with the understandings which were reflected in Secretary Udall's letter of March 20, 1964 to Chairman Seaborg, I am forwarding Volumes I and II of the Preliminary Safety Analysis Report filed by the Arkansas Power & Light Company for the proposed construction and operation of a pressurized water nuclear reactor at the applicant's site located in the southwest portion of Pope County, Arkansas. The proposed reactor has been designated as the Russellville Nuclear Unit.

We would appreciate receiving the results of a review by the Engineering Geology Branch of those geological features of the location for the proposed nuclear power reactor which may have a bearing upon our evaluation of the suitability of the proposed site.

Your prompt review and comments will be appreciated.

Sincerely yours,

Original Signed by
Frank W. Karas

for Roger S. Boyd, Assistant Director
for Reactor Projects
Division of Reactor Licensing
