Honorable John Paul Hammerschmidt
House of Representatives

Dear Mr. Hammerschmidt:

We are pleased to respond to your January 2, 1973, letter to Chairman Schlesinger in regard to safety regulations prevailing during construction of Arkansas Power and Light Company's Arkansas Nuclear One - Unit 1 power plant in Russellville, Arkansas.

Enclosed is a copy of the construction permit (CPPR-57) granted by the Atomic Energy Commission on December 6, 1968. Also enclosed is a copy of Part 50 of the Commission's regulations, which pertain to the licensing of production and utilization facilities by the Atomic Energy Commission, including §§ 50.54 and 50.55 referred to in the construction permit. Neither the Commission's regulations nor the conditions of construction permit CPPR-57 address matters of industrial safety during construction. Presently, matters relating to industrial safety during construction of a nuclear facility are covered by appropriate state laws and/or regulations of the U. S. Department of Labor.

Please call on us if we can be of further assistance to you in this matter.

Sincerely,

THIS DOCUMENT CONTAINS
POOR QUALITY PAGES

Docket No. 50-313

Honorable John P. Hammerschmidt
House of Representatives

Dear Mr. Hammerschmidt:

We are pleased to respond to your January 2, 1973 letter to Chairman Schlesinger in regard to safety regulations prevailing during construction of Arkansas Power and Light Company's Arkansas Nuclear One - Unit 1 power plant in Russellville, Arkansas.

Enclosed is a copy of the construction permit (CFPR-57) granted by the Atomic Energy Commission on December 6, 1968. In addition enclosed is a copy of 10 CFR Part 50 which pertains to the licensing of production and utilization facilities by the Atomic Energy Commission. Your attention is invited to Part 50.55 of this document which details the only conditions imposed by the Commission on the construction permit for this plant. Because it is outside the scope of responsibility for the Atomic Energy Commission, these conditions do not address matters of industrial safety during construction.

Please call on us if we can be of further assistance to you in this matter.

Sincerely,

A. Giambusso, Deputy Director
for Reactor Projects
Directorate of Licensing
