

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D. C. 20555

February 1, 1978

Note To: R.P. Snaider, ORB #2

From: William J. Olmstead, ELD

Subject: CONSTITUENT REFERRAL FROM CONGRESSMAN
HAMMERSCHMIDT RE ANO-1

The proposed response to the Honorable John Paul Hammerschmidt regarding a constituent request for information about waste disposal at Arkansas Nuclear One has been reviewed. No problems were identified in the material discussed. The reply, however, is incomplete in its treatment of high level waste. This office recommends that the discussion of high level waste at ANO-1 be amplified.

↓ Received from OELD 8:30AM 2/3/78

This is similar to other responses to Congressional inquiries regarding high level wastes. Since the constituent does not raise specific concerns it appears acceptable to me to continue to use this level of detail in our response.
