POOR ORIGINAL

Dear Sirs,

Ref. ANPR, 10 CFR 60, F.R. Vol. 45, No. 94, 31393

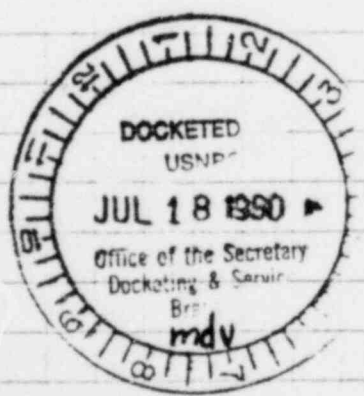

I believe the technical criteria to be very good for a first cut to the public. I have a few specific comments.

60.111 (a)(3)(i)

Quoting an annual rate quantitatively appears very premature. The rates should be different for different radionuclides.

General

Though it may be an EPA responsibility I believe that the concept of relative risk must be addressed either as an equivalent or a body of otherwise, ALARA necessitates it!

Sincerely,
R.E. Johnson

L-4-1, A-60
