

NOTE TO FILE:

REGARDING WESTINHOUSE'S REQUEST TO ADD AN INTERMEDIATE CONSIGNEE TO
REACTOR LICENSE XR-131

This amendment request to add an intermediate consignee to XR-131 should remain active. However, due to the urgent requirement by the customer for 109b components which have been customarily shipped under the authority of the utilization facility license, Westinghouse is applying for a separate component license to cover these parts rather than wait for the amendment to be approved by the Executive Branch as shipment is scheduled for July 23, 1980.
