

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

July 14, 1980

MEMORANDUM FOR: Acting Executive Director for Operations  
FROM: John Ahearne *J Ahearne*  
SUBJECT: SEQUOYAH

At a recent Commission meeting NRR staff indicated they were discussing an ignition system with TVA as a possible means of addressing hydrogen control for ice condenser plants. I would appreciate a short paper on the status of this review, a description of the proposal, its applicability to other ice condenser plants, and an estimate of when NRR will have a position on this proposal.

Please provide this by COB, July 18.
