Inspection Summary:

Areas Inspected: Measurement and Statistical Controls; Inventory Difference (ID) and its associated limit of error (LEID); and Shipping and Receiving.

The inspection involved 33 inspector-hours on site by one NRC inspector and was begun during the regular hours.

Results: The licensee was found to be in compliance with NRC requirements in the two areas examined during the inspection except for the following item:

1. A review of the measurement control program was not performed within the required 12 month interval (Infraction).
