XU08342
Amendment No. 03
(Formerly 54E-8342)

40-2544

NOTE TO FILE:

SUBJECT: PROPOSED EXPORT OF DEPLETED URANIUM TO CANADA (XU08342, AMENDMENT NO. 03)

This request, for 198,500 pounds of depleted uranium to Canada for remelt and ultimate processing into ammunition for the USAF, was originally processed as new export license application XU08503; however, the applicant prefers for recordkeeping purposes to amend license XU08342 since the material will be used in the same program started under license XU08342.

Accordingly, XU08342 has been amended to increase the amount of material authorized and to extend the expiration date from 01 October 1980 to 01 October 1982, and XU08503 has been cancelled.
