Corporate Radiation Safety Officer  
Department 1081  
1144 East Market Street  
Akron, OH 44316

Gentlemen:

Enclosed is Amendment No. 09 to your NRC License No. 34-00508-16  
in accordance with your request.

As discussed in a telephone conversation between Ed Puhala and myself on  
January 29, 1988, the Krypton-85 sealed source for use in Bacher Coleman Model  
MM-1 Betamike source holder, has not been added to your license. Our records do not  
show this gauge as an approved device. Mr. Puhala indicated that the Bacher Coleman  
gauge has been reviewed and approved by the State of Rhode Island. I explained to  
Mr. Puhala that Rhode Island is an agreement state and regulatory authority for  
byproduct material is handled by that state. Therefore, you should have the state  
of Rhode Island contact the Nuclear Regulatory Commission (NRC) and submit  
information on the approved Bacher Coleman gauge. The gauge can then be added  
to NRC's device registry and listed on your license. If you have further  
questions the person to contact concerning this matter is Steve Baggett, 301/492-0613.

Please review the enclosed document carefully and be sure that you understand  
all conditions. You must conduct your program involving radioactive materials  
in accordance with the conditions of your NRC license, representations made in  
your license application, and NRC regulations. In particular, note that you  
must:

1. Operate in accordance with NRC regulations 10 CFR Part 19, "Notices,  
Instructions and Reports to Workers; Inspections," 10 CFR Part 20,  
"Standards for Protection Against Radiation," and other applicable  
regulations.
2. Possess radioactive material only in the quantity and form indicated in  
your license.
3. Use radioactive material only for the purpose(s) indicated in your  
license.
4. Notify NRC in writing of any change in mailing address.

8902140492 880211  
REG 3 LIC 30 PNU  
34-00508-16

5. Request and obtain appropriate amendment if you plan to change ownership of your organization, change locations of radioactive material, or make any other changes in your facility or program which are contrary to your license conditions or representations made in your license application and any supplemental correspondence with NRC. Any amendment request should be accompanied by the appropriate fee specified in 10 CFR Part 170.
6. Submit a complete renewal application with proper fee or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.
7. Request termination of your license if you plan to permanently discontinue activities involving radioactive material prior to your expiration date.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions and representations in your license application will result in enforcement action against you in accordance with the General Policy and Procedures for NRC Enforcement Actions, 10 CFR Part 2, Appendix C.

If you have any questions or require clarification of any of the above stated information, contact us at (312) 790-5625.

Sincerely,

Original Signed By  
Cassandra F. Frazier  
Materials Licensing Section

Enclosure: Amendment No. 09
