Docket Nos. 50-321, 50-366  
License Nos. DPR-57, NPF-5

Georgia Power Company  
ATTN: Mr. W. G. Hairston, III  
Senior Vice President -  
Nuclear Operations  
P. O. Box 1295  
Birmingham, AL 35201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-321/89-20 AND 50-366/89-20

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by J. E. Menning and R. A. Musser on August 26 - September 22, 1989. The inspection included a review of activities authorized for your Hatch facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities appeared to violate NRC requirements. However, because all of the criteria for categorization of licensee-identified violations were met, the violation is not being cited. Therefore, no response to this violation is required. The details pertaining to the licensee-identified, non-cited violation are described in the enclosed Inspection Report.

Your attention is also invited to the unresolved item identified in the Inspection Report. This matter will be pursued during future inspections.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

*Signed by*

Alan R. Herdt, Chief  
Reactor Projects Branch 3  
Division of Reactor Projects
