Re: License No. 34-16779-01

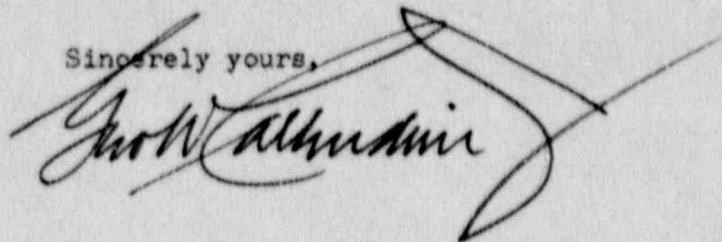

Dear Mr. Sreniawski:

I am responding to your letter dated September 22, 1989.

I am placing on my calendar a schedule to wipe test all sources in my possession over 100 uCi, so that I will be in conformance with the regulations. This should correct the irregularity with which I have leak tested these sealed sources in the past, and will formalize the procedure.

I trust this satisfactorily responds to the concern in your letter. If not, please contact me.

Sincerely yours,

GWC:mt
