Re: Submission of revised Security Plan

Enclosed is a copy of our newly revised Security Plan. The primary purpose of the revision is to document the move of one of our SNM storage facilities.

The new facility is similar to the old and offers equivalent protection of the SNM. The new Security Plan has been reviewed and approved by our Nuclear Safety Committee.

This document is not for public disclosure as per the provisions of 10 CFR, Part 2.790.

Please destroy or label "INVALID" any older revisions of our Security Plan that you may possess.

If additional information is desired, please contact me.

Very truly yours,

Philip M. Orlosky
Operations Manager
