Trojan Nuclear Plant
Docket 50-344
License NPF-1

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington DC 20555

Dear Sir:

License Change Application 172, Revision 1

Attached is one signed original of Revision 1 to License Change Application (LCA) 172 requesting amendment of Operating License NPF-1. This LCA revises the surveillance requirements for Containment leak testing to make Trojan Technical Specification (TTS) 4.0.2, "Applicability", not applicable. The revision was necessary, per your request, to show more precisely the inconsistencies between sections of the present TTS. A change bar in the right-hand margin of Attachment A shows the changes from Revision 0. There are no further changes to Attachment B.

Also attached is one signed copy of a Certificate of Service for LCA 172, Revision 1 to the chief executive of the county in which the facility is located and the Director of the State of Oregon, Department of Energy.

Sincerely,
