Centlemen:

Carolina Power & Light Company hereby withdraws the request for license amendment for the Brunswick Steam Electric Plant, Unit Nos. 1 and 2, dated June 24, 1987, regarding internal torus design temperature. The proposed amendment requested a change which raised the maximum internal temperature of the suppression chamber, specified in Technical Specification 5.2.2.b, from 200°F to 220°F, which corresponds to the design temperature for components internal to the torus. The Company intends to re-evaluate the need for this change at a later date and, if necessary, submit a new request.
