Gentlemen:

Subject: Combined Inspection Report Nos. 50-245/89-81, 50-336/89-81 and  
50-423/89-81

A routine, safety inspection of your annual emergency preparedness exercise was conducted by Mr. C. Amato of this office and other members of an NRC team on October 3-5, 1989, at your Millstone Nuclear Power Station, Waterford, Connecticut. Discussions of our findings were held by Mr. Amato with your staff at the conclusion of the exercise.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations of the emergency exercise by team members.

Within the scope of this inspection, no violations were identified. Northeast Nuclear Power Company's performance during the exercise demonstrated the ability to implement the Millstone Nuclear Power Station Emergency Plan in a manner that would provide adequate protective measures for the health and safety of the public.

No reply to this letter is indicated. Your cooperation with us in this matter is appreciated.

Sincerely,  
Original Signed By:
