Docket No. 50-382
License No. NPF-38
Reporting of Licensee Event Report

Dear Gentlemen:

Attached is Licensee Event Report Number LER-89-002-01 for Waterford Steam Electric Station Unit 3. This LER provides information on the component walkdowns performed on 58 other safety related valves mentioned in the initial issue of the LER. A summary of problems noted is provided in the LER text. The original due date for the submittal of this LER was November 9, 1989. An extension for submittal by November 13, 1989, was requested from the Region IV Director of Reactor Projects, Section A, due to extenuating circumstances. This Licensee Event Report is submitted pursuant to 10CFR50.73(a)(2)(ii).

Very truly yours,

J.R. McGaha
